

singularity. sleep. play.

time is speeding up!

it is not pushed from the past.  
it is pulled from the future.

time is only experienced by the events which take place within it.

in the first act time moved slowly.  
early Universe was a pure plasma; a swarm of electrons.  
little was going on.  
there were no atomic systems. there was no chemistry.  
no molecules. no life. no species.  
no language. no culture.

time is speeding up!

as the Universe ages It complexifies.  
new systems emerge out of established ones.  
since 13800 000 000 years the pattern has been more and more.  
more structures arise through time.  
more and faster. much more faster!  
acceleration is part of the game.  
each advancement into complexity proceeds more quickly than the ones before it.  
the outcome of future will be more in less time.

time is speeding up!

creation is speeding up.  
complexity progressed into the domain of culture and language, tools and symbols.  
the evolving Universe is an Art making machine.  
Art is the best It can do.

as humans emerged they became an essential feature of the game.  
language is the key in their play.  
it is the co-creator of evolution.

act spontaneous.  
You must play along.  
Art is the best You can do.

time is speeding up!

the Universe is getting Its act together.  
It is connecting the dots.  
connectivity and complexity is the name of the game.  
all in correlation with all else.  
becoming ever more aware and more self-conscious.

time is speeding up!

it is not pushed from the past.  
it is pulled from the future.

play. sleep. singularity.
